AFP CARE PROGRAMS

Preventative Maintenance & Extended Facility Support

WHY?

All fitness equipment breaks down. The key is to decrease the frequency and reduce the extent of costly repairs.

HOW?

Regularly scheduled visits by AFP Certified technicians can extend the useful life of your equipment by up to 60%! We look for problems before they turn into out of order equipment.

SAFETY FIRST!

Frayed cables, worn belts, and other fitness part failures can often be discovered well before they may result in an unnecessary safety risk to your members, guests, employees, or students.

SOLUTION?

Call AFP today for a complementary evaluation of your fitness facility or simply visit us on the web to request your facility evaluation at:

AFP CARE PROGRAMS

CARING FOR YOUR FACILITY

- Keep your equipment looking great and performing in optimal order.
- Protect your investment while increasing the life of your equipment.
- Reduce equipment down time and increase user satisfaction!
- Let AFP anticipate your spare parts requirements as we increase our stock levels for CARE program clients.*
- Operate a safe facility and prevent injury and other liability related issues with AFP's support!

AFP CARE PROGRAMS INCLUDE

Each piece of equipment registered in the AFP Care Program will receive a detailed esthetic and functional inspection including but not limited to the following:

- Factory recommended lubrication and component cleaning.
- Belt, chain, and cable adjustment.
- Thorough Inspection of equipment operation and performance.
- Calibration of lift & drive motors as required.

Contact us today to begin your AFP Care Program!
